

CHINCHANA LAXMI P

+91-8088932925 | chinchanalaxmip@gmail.com | [LinkedIn](#) | [GitHub](#)

Professional Summary

Computer Science Engineering graduate with hands-on experience in web and Android application development using JavaScript, React.js, Node.js, Kotlin, and Jetpack Compose. Skilled in building responsive applications, REST API integration, and offline-first mobile solutions using modern development practices. Strong foundation in Object-Oriented Programming, problem-solving, and user-focused application development.

Education

B.E. in Computer Science and Engineering | CGPA: 7.88

Canara Engineering College, Mangalore | 2022 – 2026

Pre-University Education | Percentage: 89.5

St. Michael's PU College, Madikeri | 2020 – 2022

SSLC | Percentage: 93.92

St. Michael's High School, Madikeri | 2019 – 2020

Skills

Languages: Java, JavaScript, Kotlin, HTML, CSS

Frontend: React.js, Tailwind CSS, Vite, Jetpack Compose

Backend: Node.js, Express.js

Database: MongoDB (Basic), Room Database

Tools & Platforms: Android Studio, Git, GitHub

Fundamentals: OOP, REST APIs, Basic Data Structures, MVVM Architecture

Projects

Android Application Project | Project Link: <https://github.com/chinchanalaxmi/gokulahealth> | May 2026

Tech Stack: Kotlin, Jetpack Compose, Room Database, MVVM | **Role:** Project Developer

- Developed an Android application for livestock health and dairy management
- Implemented milk tracking, cattle registration, vaccination reminders, and analytics dashboards
- Used Room Database for offline-first local data storage
- Followed MVVM architecture and modern Android development practices using Jetpack Compose

Guest Book Application | Project Link: <https://github.com/chinchanalaxmi/guestbook-app> | August 2025

Tech Stack: JavaScript, Node.js, Express.js, HTML, CSS | **Role:** Full Stack Developer

- Developed a full-stack guestbook application handling user submissions with REST APIs and dynamic frontend rendering
- Created RESTful APIs for storing and retrieving data using Express.js
- Built a simple frontend interface to dynamically display user messages
- Implemented JSON-based data handling and server-side logic

Website Accessibility Analyzer | Project Link: <https://github.com/chinchanalaxmi/website-analyzer> | June - July 2025

Tech Stack: React.js, Tailwind CSS, JavaScript, Node.js, Express.js, MongoDB | **Role:** Full Stack Developer

- Developed a full-stack web application to analyze website accessibility using Lighthouse and axe-core
- Built responsive UI using React and Tailwind CSS with support for exporting reports (PDF/CSV/JSON)
- Integrated Puppeteer and AI-based suggestions to automate accessibility checks
- Designed backend APIs and managed data storage using MongoDB

Certifications & Achievements

- TCS TechBytes 2025** – Statewide IT quiz organized by TCS & BITES, Karnataka.
- IDEATHON 2025** – Organized by Dept. of AI & ML & CSE, Canara Engineering College.

Soft Skills

Communication | Teamwork | Problem-Solving | Adaptability
